

Multifunction Counter

- ◆ Provides accurate order, batch and shift production counts
- ◆ Can be configured to most production requirements
- ◆ Accurate rate metering

Features

- ◆ Five (5) digit LED "Order Total" counter with reset pushbutton.
- ◆ Five (5) digit LED "Shift Total X 10" counter with reset pushbutton.
- ◆ Three (3) digit rate meter; accurate to ± 1 unit per time period.
- ◆ Three (3) "Batch Count" thumbwheel switches (0-999) with relay contact output.
- ◆ Can be supplied for both piece counting and lineal footage monitoring.
- ◆ "J" interlock capability for highly accurate counts.
- ◆ Available in either English or Metric displays.
- ◆ Adaptable to a variety of input sensors.

General Specifications

Digit Size: .8" high (20mm)

Digits are slightly angled for easy reading.

Digit Color: Red

Supply Voltage: 115V \pm 10% 50/60 Hz.

Output Relay: 120VDC 5 amp with adjustable dwell and optional adjustable delay.

Mechanical Details

Maximum Cabinet Dimensions:

Height: 16 " (419mm)

Width: 10" (254mm)

Depth: 6 " (159mm)

Material: 14 gauge steel

Benefits:

Accurate order, shift and batch counts. Utilization of the "J" interlock insures correct production information since only (1) unit will be counted for each machine feed.

Accurate rate metering (± 1 /event) will assist operators and supervisors in setting and maintaining production goals. This will eliminate supervisor "timing" with a watch to approximate running rates.

At a glance, this production information is available to both operator and supervisor. Accurate, legible production information will assist in plant profitability.
