

SPEED CHART RECORDER

Features:

The desktop SCR monitors production rates and machine downtime.

Standard paper travel is 4 inches per hour (1 inch = 15 minutes). Other rates are available upon request.

Allows the operator to make notations for varying production purposes (order number, downtime reason, etc.)

Hinged clear plastic cover for easy access.

May be configured to monitor either lineal or piece production.

The graph paper has major graduations of 1 inch, with 10 by 5 minor graduations per inch.

A variety of input sensors are available to accommodate any type of production equipment.

Mechanical Details:

Maximum Cabinet Dimensions:

Height: 6 1/2" (159mm)

Width: 17 1/4" (438mm)

Depth: 14 7/16" (373mm)

Material: Aluminum housing with hinged plexiglass cover.

COPAR Corporation

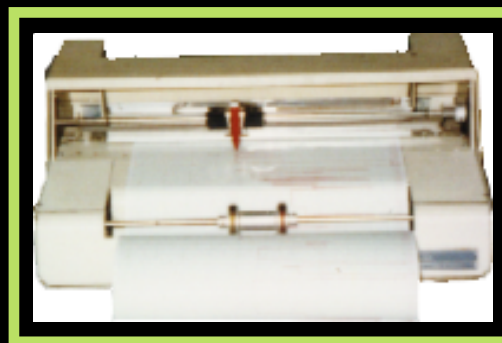

General Specifications:

Tracing provided by replaceable felt tip pens.

Graph paper provided on 100 foot rolls.

Supply Voltage: 115V \pm 10% 50/60 Hz or
230V \pm 10% 50/60 Hz

The SCR

Provides a continuous
production record
on 10 inch
wide
graduated
graph paper.
